

# Delta Force Black Hawk Down Upriver Mission Orders

FROM: Delta Force Base Commander, Bwava Delta Force Base

To: Special Delta Force Operative

General Order Number 7690576

ORDERS: From Bwava Air Base, operative is directed to be shuttled via Blackhawk Helicopter to a designated LZ south of the Konga River. LZ may be hot, therefore, two team-mates will be manning the Blackhawk miniguns to assist in your exit from the helicopter.

After you are dropped off at the LZ, make your way across the river to the village of Lanata. A friendly pick-up truck will take you east, through the town of Nogora, to the river town of Tigi-Toowadi. A friendly citizen with a boat will be waiting for you. The boat will take you up river to just east of the Mashidaban City Bridge.

Your targets are weapon crates. Informants tell us they are being stored at two locations, in warehouses at South Mashidaban and at the Natawo Military Base, west of North Mashidaban. Destroy all crates at both locations.

Another friendly pick-up truck will be waiting west of the Natawo Military Base, at the base of a hill, to take you back to the air base. Upon arrival, report to the base Sergeant Major who will be waiting for you in front of the Headquarters Building.

***POSSIBLE ENEMY FORCES: Enemy trucks constantly patrol all areas. If possible, do not engage enemy trucks unless you are pursued and fired upon. Some small villages could have enemy checkpoints so be wary when moving through these areas. Enemy forces are stationed at both locations near the warehouses. All civilians in Mashidaban city have been evacuated, but enemy forces could be in the city. The city has been in a state of unrest for several years and has fallen into ill repair.***

Good luck and remember to keep your head down.

Walter E. Miller  
Colonel, USArmy  
Commander, Bwava Delta Force Base
